Simple Green Clean Building Carpet Cleaning Concentrate

Dilution Rate (oz./gal.): 6oz./1gal.

Application Rate (oz./ft²): 0.314/1 sq ft

Cleaning Instructions: PRE-SPRAY WITH EXTRACTION: 1. Vacuum floor thoroughly. 2. Mix 1 part concentrate to 21 parts cold water (6 ounces concentrate to 1 gallon cold water) 3. Pre-spray the carpet until fibers are moistened. 4. Light agitation of carpet with a carpet brush or rake will increase cleaning efficiency. 5. Let stand for 5 minutes before extracting. 6. To extract, fill the extraction machine's reservoir with water. Use the equipment according to manufacturer's instructions. 7. Maximize the amount of water removed from the carpet by making a water extraction pass with the water spray on and then again with the spray off and the vacuum on. 8. Test the carpet with your hand. If your hand comes away with water droplets, extract again with the spray off. If your hand comes away damp and the carpet feels wrung out, you have extracted correctly. 9. Wait overnight for the carpet to dry before walking on it. To dry thoroughly, open windows and use fans. 10. Once carpet is completely dry, vacuum thoroughly.

Cleaning Solution Program

Type: Pre-spray

Certification From: 12/31/2022

Certification Expiration: 12/31/2023

THE CARPET AND RUG INSTITUTE

100 S HAMILTON STREET
DALTON, GA 30720-4612
